# OUR STORY

In 2022, Carib Glassworks Limited and ANSA Polymer decided to join together to become the region's only one-stop packaging solution provider.

Their seven decades of experience and expertise in producing glass and plastic packaging products provided a unique opportunity to re-position the two companies. Relunched as ANSA Packaging Limited, the Vision is to become the region's packaging partner of choice by providing new and innovative competitive packaging solutions through sustainable operational excellence.

## MISSION

To become the region's packaging partner of choice by providing new and innovative competitive packaging solutions through sustainable operational excellence.

## VISION

To be an established regional enterprise with a trusted brand of world-class full-service packaging solutions backed by exceptional customer experiences.

# TOTAL PACKAGING, ENDLESS POSSIBILITIES

Glass packaging offers a perfect blend of sustainability and elegance, making it the ideal choice for preserving the purity and quality of products.

With its timeless appeal, glass packaging not only provides a durable and eco-friendly solution but also enhances the visual allure of any item it holds. 100% recyclable and infinitely reusable, glass packaging reflects a commitment to environmental responsibility without compromising on style or performance.

Whether for food, beverages, cosmetics, or pharmaceuticals, glass packaging ensures that your products remain fresh, protected, and beautifully presented.

# SUSTAINABILITY

## SUPPLIER LEADERSHIP ON CLIMATE TRANSITION (SLOCT).

Carib Glassworks of ANSA Packaging has successfully received its first badge for the completion of Scope 1- and 2-foot printing as part of its participation in the Supplier Leadership on Climate Transition (SLOCT). This programme is a collaboration of global brands committed to carbon emissions reduction.

The badge represents the progress made to reduce Carib Glassworks' impact on climate change and signifies its shared ambition for global standards compliance with several multinational manufacturers who have also signed onto the SLOCT, some of which are clients of Carib Glassworks.

In 2023, the Scope 3 emissions exercise was completed, and ANSA Packaging is currently awaiting the badge for this. This data is currently under review and will be disclosed in subsequent annual reports, along with that of other sectors.

## GLASS RECYCLING

**ANSA Packaging** – increase the volume of cullet collected through local recycling efforts for use in the manufacturing process. ANSA Packaging has been working tirelessly to increase the volume of glass collected locally for use as cullet in the manufacturing of new glass. There was a 91% increase in the volume of glass collected locally between 2022 and 2023.

## ANSA POLYMER

ANSA Polymer, the plastic manufacturing arm of ANSA Packaging manufactures the reusable HDPE crates for Carib Brewery. Crates that are in rotation and no longer suitable for use are returned to ANSA Packaging and ground for reuse as a new material. This includes those in the St. Kitts and Nevis brewery where the crates are ground and shipped to Trinidad for reuse at ANSA Polymer.
